EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

2. Authorization for this examiner's amendment was given in a telephone interview with Evan Witt on May 11, 2006.

The application has been amended as follows:

In claim 1, line 6, the word "said" has been deleted.

3. The following is an examiner's statement of reasons for allowance: The closest prior art of reference is the admitted prior art, US 3900633 by Piron and CN 1282767 by Iishima, disclosed in the applicant's specification which goes on to describe an image-transfer medium includes a transparent substrate and a transferable material formed on the substrate surface. The graphics on the transfer medium is removed and applied onto an article, leaving a hollowed transferable material with a specific vacant pattern (paragraphs 0003-0005). However, the prior art does not teach transferring the remaining material onto a light transmissible surface of an article, thus allowing light emitted from a source to penetrate through the specific pattern vacancy, nor a transfer medium with a pattern comprised of dots. Zemel (US 5891289) also teaches a similar transfer method where a tool or instrument is used to apply a pattern onto an article, but like the admitted prior art, Zemel does not teach transferring the remaining sheet onto a light transmissible surface of an article nor a transfer medium with a pattern comprised of dots.
